

In the Balearic Islands, the water we have depends mainly on the rain that infiltrates.

The water that rains (the recharge) is not in your hand, but the consumption you make (the extraction) is.

Keeping the scales balanced is up to you.

Use water responsibly.

**In summer we
consume more water
than the one that
enters the system...**

**BALANCE THE
SCALES!**

CHOOSE TOURIST ESTABLISHMENTS THAT ARE MORE SUSTAINABLE, SUCH AS THOSE THAT HAVE IMPLEMENTED WATER REUSE SYSTEMS OR MEDITERRANEAN GARDENS.

MAKING RATIONAL USE OF WATER DEPENDS ON YOU.

TAKE SHOWERS INSTEAD OF BATHS. TAKE FIVE-MINUTE SHOWERS. DO NOT FLUSH THE ENTIRE CISTERN IF IT IS NOT NECESSARY. REMEMBER TO NOTIFY RECEPTION IF YOU DETECT PLUMBING LEAKS.

DRINKING WATER SHOWERS ON BEACHES CONSUME MORE THAN 10 LITERS PER MINUTE. AVOID DOUBLING YOUR WATER CONSUMPTION BY SHOWERING AT THE BEACH AND AT THE HOTEL.

LAUNDRY SERVICE IS A VERY IMPORTANT WATER CONSUMPTION. REUSE TOWELS AND REQUEST A CHANGE OF LINENS ONLY IF NECESSARY.
